AIR CONDITIONING

SPECIALISING IN

Air Conditioning Coil Cleaning Servicing and Maintenance

How long since your commercial air conditioning unit has been cleaned and serviced?

We are specialised in commercial air conditioning coils cleaning on AHUs, PCUs, FCUs, Computer air Units, service and maintenance.

We breathe about 25 litres of air every day, but do you know if every breath you take is really healthy clean air?

Evaporator Coils / Cooling Coils provide an ideal environment for breeding bacteria and other microorganisms – some dangerous, even deadly. Yearly cleaning ensure energy efficiency and a healthy environment.

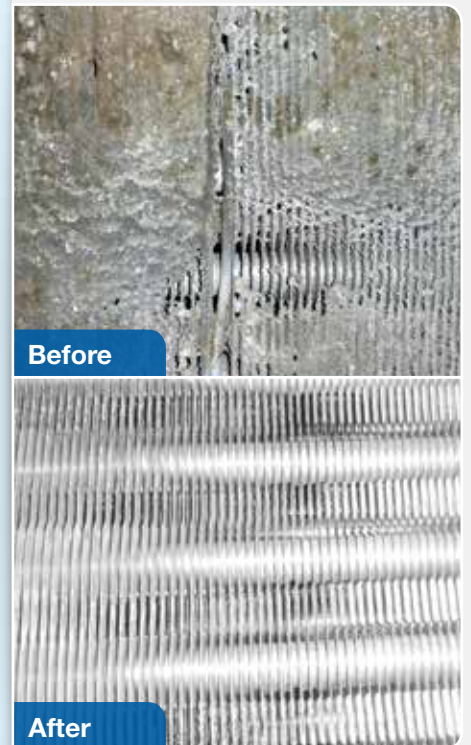

More than 70% of all indoor air quality problems involve air conditioning systems. Dirty cooling coils also result in higher electricity bills, reduced air supply flow and Premature failure of expensive Hvac components and drain blockage resulting in flooding ceilings and damage.

The trusted team at Sydney Air Conditioning Carry out a Jsea, prestart and obtain all relevant permits.

The processes we undertake:

- Isolate power to air conditioning unit and tag
- Clean and flush drains
- Dismantle and wash both fan blower
- Assembly
- Apply coil cleaning chemical to coil
- Clean cooling coil with hot water manage drain
- Make sure no overflow
- Clean motor assembly and tighten all motor assembly
- Secure and test run the unit
- Check for vibration and running noise etc.

We service air conditioning in hotels, apartment building, hospitals and offices – not project too big or too small.

Trust the Air Conditioning Team that's Been Servicing Sydney for Many Years!
